Palm Scanner

AVAILABLE ON   

Full palm, dual iris, multimodal biometric capture for field enrollment.

Empowering field teams with full biometric capture technologies for accurate and reliable enrollments in any environment.

Purpose built for frontline identity enrollment, Grabba Scout empowers border agencies, law enforcement teams, investigative units, and crime scene specialists with fast, accurate biometric enrollment capabilities. Full palm (upper, lower, writer's) and rolled prints, iris capture and face capture capabilities provide a flexible and high integrity all-in-one full biometric collection station to accomplish everything from rapid field enrollments to complex investigative workflows.

Designed for mobility without sacrificing precision, Scout delivers consistent, reliable results. With rugged construction and intuitive operation, it empowers field teams to perform biometric enrollments that meet operational and evidentiary demands even in challenging or unpredictable environments. By combining mobility and precision in one integrated solution, Scout gives agencies the confidence to conduct secure, defensible biometric enrollments that stand up to operational, investigative, and evidentiary demands.
